2. Hospital Universitario de Santa Maria, Lisbon, Portugal
3. IMO, Instituto de Microcirugia Ocular, Barcelona, Spain
4. Clinica Dr Mario Ferraz, Campinas, São Paulo, Brazil

Operative Exposure

- **Lisbon:** J. Carlos Neves
 1. Surgical procedures: rhinoplasty (70%); otoplasty; blepharoplasty; face lift; platysmoplasty; mentoplasty; lipofilling. average 12 procedures/week
 2. Aesthetic procedures: fillers; toxins; peelings
 3. Facial growth & dental-facial orthopedics (Dr Silvia Martins Neves, MDM, MSc)
 4. Orthognathic surgery (Dr Sandra Ferreira)

Dr Carlos Neves cooperates with dermatology, general plastic and aesthetic medicine colleagues who additional procedures can be observed with
- **Barcelona:** Ramon Medel, MD
 1. Oculoplastic: general principles; eyelid rejuvenation; eyelid malposition; eyelid reconstruction; midface lift; endoscopic brow lift; orbitofacial trauma; orbital surgery; lacrimal system; conjunctiva and ocular surface pathology
 2. Aesthetic procedures: fillers; toxins
- **Sao Paulo** Mario Ferraz
 1. Surgical procedures: rhinoplasty (cosmetic, functional, revision, cleft lip rhinoplasty); nasal reconstruction; otoplasty; blepharoplasty; canthoplasty; aging face surgeries (facelift; brow lift); chin implants
 2. Non-surgical procedures: fillers; toxins

Mandatory Criteria for Fellows to Practice

Speak Portuguese and to be part of Portuguese Medical Council

Salary

None (unpaid fellowship)

Additional Information

We host 2 fellows simultaneously and aim to expose them to a vast number of procedures that represent several fields in facial plastic surgery. Based on that goal we designed our 1 year fellowship program in 3 different realities: Lisbon (8 months), Barcelona (2 months) and São Paulo (2 months).

**Fellowship Director****Prof. Dr. Fazil Apaydin****Contact Details**

Professor of Otorhinolaryngology, Ege University
Bornova, Izmir 35100, Turkey

Affiliated Centres

1. Ege University Hospital, Izmir, Turkey
2. Solo Private Practice, Izmir, Turkey
3. Private Gazi Hospital, Izmir, Turkey

Operative Exposure

- Aesthetic and functional rhinoplasty
- Nasal reconstruction
- Otoplasty
- Mentoplasty
- Facelift
- Endoscopic brow lift
- Skin cancer excision and reconstruction
- Facial nerve paralysis rehabilitation
- Aesthetic rejuvenation procedures (invasive and non-invasive)

**Mandatory Criteria for
Fellows to Practice**

Fellows participate in surgery under direct supervision

Salary

None (unpaid fellowship)

Additional Information

Prof. Dr. Fazil Apaydin is a full-time professor at Ege University Hospital, where he works on weekdays from 08:30 to 16:00. After university hours, he consults private patients at his office. Fellows will gain substantial exposure to rhinoplasty procedures and selected facial reconstruction cases at the university clinic. Associate Prof. Dr. Serçan Göde and Associate Prof. Dr. Isa Kaya also work in the same department, and fellows will have the opportunity to participate in their surgical cases as well. Aesthetic rhinoplasty and facial rejuvenation procedures are primarily performed in private settings, with a limited number of invasive cases such as blepharoplasty and facelift surgeries.

St Bartholomew's and The Royal London Hospitals
London, United Kingdom

✉: spaun@me.com

🌐: www.symmetryclinic.com

Affiliated Centres

1. St Bartholomew's and The Royal London Hospitals
2. Queen Mary's University
3. Symmetry Clinic – Facial Plastic Surgery

Operative Exposure

- Aesthetic and functional rhinoplasty
- Revision rhinoplasty, incl the use of auricular and costal cartilage
- Reconstruction of traumatic nasal defects
- Upper lid blepharoplasty
- Aesthetic rejuvenation procedures
- Endoscopic brow lift
- Otoplasty
- Facial trauma reconstruction

**Mandatory Criteria for
Fellows to Practice**

General Medical Council (GMC) registration for hands-on experience

Salary

None (unpaid fellowship)

Additional Information

There will be hands on exposure to septorhinoplasty procedures, post traumatic facial reconstruction including multidisciplinary working within a complex facial trauma group. The candidate will be exposed to facial nerve reanimation procedures and will be asked to attend joint oculoplastic and facial trauma reconstruction clinics. There will be the opportunity to work with other allied specialists including OMFS and oculoplastics. There are residents within the department so operative work will be shared appropriately between the fellow and resident. The fellow would also be able to assist in the private sector cases performed. There will multiple opportunities for clinical research and to teach junior surgeons and in a rhinoplasty and facial aesthetic course.

**Fellowship Director****Hesham Saleh, MBBCh, FRCS, FRCS (ORL-HNS)****Contact Details**✉: h.saleh@imperial.ac.uk**Affiliated Centres**

1. Charing Cross Hospital, London, United Kingdom
2. The London Clinic, London, United Kingdom
3. Royal Brompton Hospital, London, United Kingdom

Operative Exposure

- Aesthetic and functional rhinoplasty
- Endoscopic Sinus Surgery
- Skull Base Surgery

Mandatory Criteria for Fellows to Practice

The candidate is expected to have obtained the Certificate of Completion of Training (CCT) in Otolaryngology or an equivalent recognized training program. Two referees of his/her supervisors must provide support letters before appointment. For overseas candidates a General Medical Council (GMC) registration must be obtained before starting the fellowship. Knowledge of research methodology and previous publications are desirable.

Salary

Yes – like senior residents (with whom you share the on call duties)

Additional Information

We are the largest subspecialty tertiary referral unit in the UK. The work involved is exclusively Rhinoplasty, Rhinology and Anterior Skull Base Surgery with an outpatient caseload of over 2000 patients per annum. The unit performs more 150 complex septorhinoplasties and 150 sinus/skull base procedures per year (Charing Cross Hospital) with no general ENT work. In addition, 150-200 private practice procedures can be observed by the fellow in the London Clinic. The fellowship is accredited by the Royal College of Surgeons Senior Clinical Fellowship Scheme. The candidate is expected to participate in the management of patients in the outpatient clinics and operating theatre. He/she will work as a part of team comprising the supervisor, specialist 12 registrars and Foundation Year (FY) doctors. He/she is also expected to participate in the ongoing research. At least three presentations and three peer-reviewed publications will be expected in a twelve-month fellowship period. The appointee will also join in with the audit, clinical governance and teaching in the departments. The fellowship starts every October and is advertised in <https://www.jobs.nhs.uk> in January/February of the same year.

1. Pall Mall Medical, Manchester, United Kingdom
2. Newton-le-Willows Medical Centre, United Kingdom

Operative Exposure

- Aesthetic rhinoplasty
- Revision rhinoplasty, including the use of auricular and costal cartilage
- Reconstruction of traumatic nasal defects
- Upper lid blepharoplasty
- Lower lid blepharoplasty
- Facelift
- Neck lift
- Endoscopic brow lift
- Skin cancer excision and reconstruction

**Mandatory Criteria for
Fellows to Practice**

General Medical Council (GMC) registration for hands-on experience

Salary

None (unpaid fellowship)

Additional Information

I host 2 fellows simultaneously. Training will be at the Pall Mall Medical based in Manchester and Newton le Willows, UK. Mondays and Tuesdays - facial aesthetic surgery, Wednesdays - facial aesthetic clinic, Thursdays - theatre/clinic. Fridays - research. Sat/ Sun – free

**Fellowship Directors****Professor Alwyn D'Souza****Contact Details**

A R D'Souza

✉: Chelsea@londonfacialsurgery.org🌐: www.londonfacialsurgery.org**Affiliated Centres**

1. Institute of Medical Sciences, Canterbury Christ Church University, Kent, UK
NOTE: ALL THE WORK IS BASED IN LONDON

Operative Exposure

- Aesthetic and Functional septorhinoplasty
- Skin cancer and skin cancer reconstruction
- Pinnaplasty
- Facelift, Neck lift
- Blepharoplasty
- Non-surgical aesthetic facial rejuvenation procedures: toxins/fillers/volumizers/laser/RF etc.

Mandatory Criteria for Fellows to Practice

General Medical Council (GMC) registration for hands-on experience
Occupational Health clearance from a UK based source
Medical indemnity obtained from a recognised indemnity provider
[UK's Disclosure and Barring Service \(DBS\)](#)

Salary

None (unpaid fellowship) - however, if the candidate is from the UK or the European Union and have eligibility to work in the UK, there are opportunities to take up locum jobs for 5 out-of-hours on call covers in our university hospital and some of the local London hospitals. Candidates outside this jurisdiction will have to obtain registration using one of the mechanisms/pathway listed on GMC-UK website.

Additional Information

We offer a comprehensive fellowship program for fellows of Europe and worldwide. This will be for a period of one year and fully in line with the rules and formalities of the EAFPS. This will be a hands on (scrub-in) fellowship with plenty of surgical opportunities for the fellows to hone their skills in all aspects of facial plastic surgery. In addition to clinical work, the fellows are expected to work heavily on research and be involved in publishing peer-reviewed articles. Fellows should attend the EAFPS annual meetings and other relevant meetings and are preferred to present papers in these meetings. Fellows in conjunction with EAFPS education board will have to undertake the Board certification examination at the end of a year of fellowship.

Timetable

- Monday – Operating theatres
- Tuesday – Outpatient clinic
- Wednesday – AM and PM – Surgery/Research
- Thursday – Operating theatre/research
- Friday – Outpatient clinics
- Saturday – Surgery/minor ops/non-surgical

University Hospital Lewisham London SE13 6LH United Kingdom

✉: baskaranent@gmail.com

Affiliated Centres

1. Manchester University NHS Foundation Trust
2. Spire Manchester Hospital

Operative Exposure

- Functional and cosmetic septorhinoplasty
- Cleft septorhinoplasty
- Nasal reconstruction following skin cancer excision and trauma
- Ear reconstruction following oncological excision and congenital ear anomalies (including microtia)
- Pinnaplasty
- Skin cancer excision and reconstruction
- Septal perforation repair
- Advanced endoscopic sinus surgery

Mandatory Criteria for Fellows to Practice

General Medical Council (GMC) registration for hands-on experience
English language proficiency (IELTS or equivalent)

Salary

None (unpaid fellowship).

Additional Information

This is an advanced, hands-on fellowship in rhinoplasty and facial and ear reconstruction, designed for senior trainees or post-CCT surgeons seeking subspecialist expertise in facial plastic surgery. The unit provides high-volume functional, aesthetic, and reconstructive nasal surgery and is actively developing a regional Congenital Ear Anomaly (Microtia) Reconstruction Service.

The fellow will work within a multidisciplinary team, collaborating closely with Oculoplastic Surgery, Maxillofacial Surgery, and Dermatology, and will participate in Skin Cancer MDTs, joint Cleft/ENT clinics, and Regional Rhinology and Facial Plastic Surgery MDTs.

The fellowship offers comprehensive exposure to complex facial plastic and reconstructive surgery within a tertiary referral centre.

- Aesthetic and Functional rhinoplasty
- Revision rhinoplasty, including the use of auricular and costal cartilage
- Reconstruction of traumatic nasal defects
- Multidisciplinary cleft care
- Upper and lower lid blepharoplasty
- Facelift
- Otoplasty
- Skin cancer and skin cancer reconstruction
- Facial nerve paralysis rehabilitation
- Facial trauma reconstruction
- Ablative head and neck surgery and reconstructive procedures

Mandatory Criteria for Fellows to Practice

Being able to speak the Dutch language

European certified medical specialist in Otorhinolaryngology

Salary

Yes

Additional Information

We host one fellow per year. Our program includes exposure to parotidectomy procedures, and a specialized facial cleft team is integrated within the Children's Department. At Hagaziekenhuis Zoetermeer, the primary focus is on skin cancer surgery and reconstructive procedures. Rhinoplasty and a limited number of facial paralysis reconstructions are performed at Leiden University Hospital. Additionally, private practice settings (Wever-Clinics and Boerhaave) provide opportunities to observe and participate in facelifts, blepharoplasty, rhinoplasty, and injectable aesthetic treatments.
